### How's the economy?

Daggett County generated another robust quarter of employment expansion. Yet, despite the recent surge in employment, the county's unemployment rate has continued to moderately increase in recent months. This uptick (shown in December data) reflects seasonal job losses. Gross taxable sales increased dramatically.

### Jobs

Daggett County generated 64 new jobs between September 2014 and September 2015 for a year-to-year growth rate of more than 14.1 percent.

This gain was almost entirely concentrated in the leisure/hospitality and construction sectors.

## Unemployment and Wages

In December 2015, Daggett County's unemployment rate measured 5.3 percent, up 1.2 percent points since the beginning of the year.

Daggett County's jobless rate currently registers above the state and national figures.

First-time claims for unemployment insurance have spiked up but are volatile due to the size of the base. It seems that some of the leisure and hospitality jobs evident in the September jobs numbers are applying for unemployment insurance in December. This is t..

The average monthly wage in the county continued to trend slightly downward.

The county's average monthly wage was \$2,645.

## Construction and Sales

There have been no construction permits issued to date in 2015.

Gross taxable sales increased by 20.5 percent in Daggett County. Due to the small base, this statistic is quite volatile.
